Letter of recommendation for Kevin Chen:

I have had the pleasure to work with and to get to know Kevin Chen over the last 2 years as a member of our Robotics Club. When I became the coach in 2018, I already knew of Kevin's outstanding academic record. As member of our club, I have been able to see him as the creative, driven, and personable leader that he truly is. Kevin's influence goes beyond his immediate team and will remain after he graduates. His dedication to multiple demanding activities are a demonstration of his talents as well as his persistence and time management abilities. Remarkably, he has a spotless academic record while simultaneously engaging in meaningful internships, assisting others with academics, and engaging in other school clubs.

Kevin stands out among the many talented and successful students with whom I have worked throughout my career. Most notable to me are his genuine curiosity and unwavering drive for success. These traits will translate into success at any university that is fortunate enough to be Kevin's next stop in his academic journey. He has experienced the necessary preparation, and there is no program of study too rigorous for him. In fact, he has expanded his own academic experience by choosing to explore Robotics independently, proposing his own plan of study, processes, and demonstration of knowledge. Additionally, Kevin relates positively with his peers and with his teachers, building relationships and communicating extremely well with individuals across multiple generations. This rare combination of experiences, dispositions, and abilities make him a unique candidate for admission.

I firmly believe that having Kevin Chen as a member of your university will in fact add value to your institution, and that he will make the most of the opportunities that are before him. I recommend him enthusiastically!

Sincerely,

Matt Walter

Assistant Principal

Robotics Team Coach
